

## Fitorch EA25 specifications

Ready for late-night adventure, the *Fitorch EA25* is a powerhouse with plenty of illumination to go around! Thanks to its high-performance Luminus SST70 LED and optical glass lens, this light outputs a max 3,000 lumens and a 250-meter throw on turbo mode. This way, you have blazing brightness that is best for hiking the trail, maintenance work, or projects in the backyard.

This light has 7 output modes, giving you a wide variety of lighting options. Thanks to strobe and SOS modes you have added protection in case of emergency. Control all output modes via simple side switch operation!

### Higher Capacity, Reliable Runtimes

The *EA25* runs on a 5,000mAh 21700 battery, which has the capacity to support high runtimes best. As a result, eco mode runs for a total of 227 hours, and other brightness level runtimes are adequately supported. This light is fully rechargeable via USB-C, offering a rapid, reliable charge that gets you right back outdoors.

- Notable Features
  - » Includes a two-way pocket clip for hands-free lighting
  - » Strobe and SOS modes available for assistance in emergencies
  - » Side switch also acts as a power indicator, letting you know when to head back
  - » Lock and unlock function helps prevent accidental activation
  - » 5-inch length and 1-inch diameter makes this a compact light that's great to carry
  - » IPX8 waterproof rating and 1-meter drop resistance protects the light from wear and tear!
