

## SH140 Solar Brick Light Instruction Manual

Solar brick light SH140 is one of the newest high-tech solar light, combining completely high efficiency solar cell, super lum LED, anti high temperature storage batteries, automatic control circuit, reasonable structure, it has advantages of green environment-friendly, nice design, safety, easy using, and working automatically. It is suitable to install in various locations such as square, road, park, dock, garden, bridge etc. as decoration illumination.

In daytime when sunlight irradiate surface of the light, the solar panel inside the light convert the sunlight into electric energy and charge its storage component, when it is dark, the light automatically turn on and lighten.

### Installation method

Diagram 1

1. Dig a hole on the ground and grout it.

Diagram 2

2. Put the mounting box inside the hole and level it with ground..

Diagram 3

3. After the grout become hard, put the light inside the mounting box and fix them together with 4 pieces of stainless steel bolt.

Diagram 4

4. The installation has been completed.

Remark: we put a little magnet on the brick in order to save power of the battery inside during long distance transport and storage. When user install the brick, just remove the magnet and the brick will work automatically.
