

Fitorch P36 Specifications

With the *Fitorch P36* by your side, you'll never be left out in the dark! This light has 8 total output modes, providing exceptional brightness and emergency signaling. From turbo to eco mode, choose what works best for your night-time adventure. Turbo mode offers a 3,000 lumen output and 346-meter throw to best light up any late-night walks or yard work. Strobe, SOS, and beacon modes offer handy signaling capabilities to call for aid and help protect you in emergency situations.

A 227-Hour Runtime

The *P36* runs on an included 21700 battery which is rechargeable via USB-C. Charge up and power on fast when recharging with USB-C, to get right back outside at a moment's notice. The 21700 battery has a capacity of 5,000mAh, providing the light with runtimes that last for the long haul. With a max runtime of 227 hours, brightness is on your side every step of the way!

- Notable Features
 - » Luminus SFT-70 LED helps light reach a max distance of 346 meters
 - » Two-way pocket clip lets you operate the light hands-free
 - » Side switch functions as a battery indicator, to let you know when to recharge
 - » Has an IPX8 waterproof rating and 1-meter drop resistance for protection from harsh conditions
